## Update Instructions

---

These update instructions must be followed to properly update the Stonemont Suite and Enterprise Version 6 installation on a computer. This update requires a previous installation of Stonemont Version 6. You should use **Windows Administrator Privileges** to update Stonemont software. If during the update you have any questions or experience any problems please call us at 970-674-1148.

Prior to updating we recommend that you complete any database synchronization and that you make a backup of your Stonemont Database. A desktop backup of the Stonemont database may be created by selecting File>Backup from within the Stonemont software but this should not be used for the server or enterprise editions.

## SCENARIO 1 – Automatic Update Using Stonemont Suite Update

---

### Application Servers or Desktop Computers

1. Login to Windows as the local computer Administrator or as a user with Administrator privileges.
2. Make sure all Stonemont software applications are closed and that no instances of Stonemont software are running on this computer.
3. Go to Start > All Programs > Stonemont > Suite V6 > Stonemont Suite Update  
The Stonemont Suite Update is a wizard-style program that will download the latest Stonemont Patch and install it on your computer. Follow the onscreen instructions in the Stonemont Suite Update.
4. After the update has completed the Stonemont Database Update Wizard will automatically load. This program will update the local Stonemont database. Follow the onscreen instructions to complete the database update.

### Web Servers – Enterprise Edition Only

1. Login to Windows as the local computer Administrator or as a user with Administrator privileges.
2. Make sure the Stonemont Enterprise Web Site is not running on this computer. This is best accomplished by stopping the web service prior to installing the patch.
3. Go to Start > All Programs > Stonemont > Enterprise V6 > Enterprise Update. Alternatively go to the Stonemont Enterprise installation folder and run WebV6Update.exe  
Go to the Stonemont Suite Web Site installation folder (drive:\InetPub\wwwroot\aggQC.Web or aggQCV5.Web) and run aggQCWebV5TrueUpdate. The Enterprise Update is a wizard-style program that will download the latest Stonemont Patch and install it on your computer. Follow the onscreen instructions in the Enterprise Update.
4. After the update has completed restart the Stonemont Enterprise web service.

## **SCENARIO 2 – Manual Update**

### **Application Servers or Desktop Computers**

1. Login to Windows as the local computer Administrator or as a user with Administrator privileges.
2. Make sure all Stonemont software applications are closed and that no instances of Stonemont software are running on this computer.
3. Download SuiteV6Patch.zip from [ftp.stonemont.com/patches](http://ftp.stonemont.com/patches). Contact us for the user name and password.
4. Copy SuiteV6Patch.zip to the Suite V6 installation folder. The default installation folder is C:\Program Files\Stonemont\Suite V6\
5. Extract the contents of SuiteV6Patch.zip from the installation folder using the following options: Overwrite Existing Files and Use Folder Names.
6. Go to Start > All Programs > Stonemont > Suite V6 > Stonemont Database Update or manually run aggQCSDB.exe from the Suite V6 installation folder. aggQCSDB is the Stonemont Database Update Wizard. This program will update the local Stonemont database. Follow the onscreen instructions to complete the database update.

### **Web Servers – Enterprise Edition Only**

1. Login to Windows as the local computer Administrator or as a user with Administrator privileges.
  2. Make sure the Stonemont Enterprise Web Site is not running on this computer. This is best accomplished by stopping the web service prior to installing the patch.
  3. Download WebV6Patch.zip from [ftp.stonemont.com/patches](http://ftp.stonemont.com/patches) Contact us for the user name and password.
  4. Copy WebV6Patch.zip to the Enterprise V6 installation folder.
  5. Extract the contents of WebV6Patch.zip from the installation folder using the following options: Overwrite Existing Files and Use Folder Names.
  6. After the update has completed restart the Stonemont Enterprise web service.
